Would it be meaningless to describe a vector without a direction?

 Doug Lerner, studied at University of Michigan
Answered May 8

Yes, because a vector intrinsically means there is a direction. Without a direction a value would be a scalar.

What stores are in Lafayette Square mall?

 Doug Lerner, studied at University of Michigan
Answered Jan 4

While there is no mall in Lafayette Square, there is a very nice shopping street on Park Avenue. There's the Park Ave Café, and many restaurants around that area. Looking glass gifts is also there,...

What are some good ways to avoid or shoo off NHK fees collectors in Japan?

<https://japantoday.com/category/national/high-court-finds-cellphone-tv-owners-obliged-to-pay-nhk-fees>

 Doug Lerner, lives in Japan
Answered just now

Interestingly enough, this happened to me just recently. The guy was really annoying. I told him I don't have a TV (which I personally don't). But my partner has one. He asked where my partner was. I politely told him to shove it - not using those words.

He came back at 9 pm (pretty rude) and I didn't answer the door. However, I vowed to record him if he did come back.

But you know - life is short. And the fees are less than 1,000 yen/month if paid annually. And we do have one TV in the house. I decided to just sign up directly with NHK so the guy (if he gets a commission) can't get credit and just have less harassment to worry about. I also read how the Supreme Court decided this past December that people really do have a legal obligation to pay, and some people are starting to get sued, and just didn't want to worry about it. So if the guy comes back I'll tell him to go talk to NHK since I have a contract and to leave me alone.

同じ神です。ユダヤ教は世界の一番古い一神教です。イエスキリストはユダヤ人でした。イスラム教は後で始まりました。でも全部は同じ神です。
